zabbix 安装篇

注意要点:

- 1、关闭 selinux
- 2、php 使用 5.4 以上,可以先查看 php 版本信息:

[root@BJ-monitor-h-01 src]# php -v PHP 5.5.35 (cli) (built: Apr 27 2016 14:53:02) Copyright (c) 1997-2015 The PHP Group Zend Engine v2.5.0, Copyright (c) 1998-2015 Zend Technologies

安装 elep 源:

rpm -Uvh

http://download.fedoraproject.org/pub/epel/6/x86_64/epel-release-6-8.
noarch.rpm

2、加入 Php 版本不够高,可以用 yum 的 remi 库升级,默认 epel 源都没带有,基本上差不多,这里我们全程方便用 rpm 的方式安装。rpm -Uvh http://rpms.famillecollet.com/enterprise/remi-release-6.rpm

3、安装 php 以及其他插件, php 可以源码安装, 以为要存放的数据库位置要制定好。

yum --enablerepo=remi,remi-php55 install php-fpm php-common php-devel
php-mysqlnd php-mbstring php-mcrypt httpd php mysql mysql-server
php-mysql php-gd php-xml php-mbstring php-ldap php-pear php-xmlrpc
php-bcmath mysql-connector-odbc mysql-devel libdbi-dbd-mysql
net-snmp-devel curl-devel mod ssl mod perl mod auth mysql net-snmp

4、配置 mysql, 创建 zabbix 库, 授权 zabbix 账户查看信息:

Create database zabbix

grant all on zabbix.* to zabbix@"%" identified by 'zabbix';

Flush privileges;

5、安装 php 插件:

yum --enablerepo=remi,remi-php55 install mysql-devel libxml2-devel net-snmp-devel libcurl-devel

下载相关 zabbix 包,课程开始前最新的是 3.0.3 的包,预算下载:下载版本可以查看:

https://sourceforge.net/projects/zabbix/files/ZABBIX%20Latest%20Stable/

6、zabbix 安装:

[root@monitor zabbix-2.2.2]# ./configure --enable-server --enable-age nt --with-mysql --with-net-snmp --with-libcurl --with-libxml2 --with-openipmi --with-unixodbc --prefix=/usr/local/zabbix [root@monitor zabbix-2.2.2]# make && make install

Cd /usr/local/src/zabbix-3.0.3/database/mysql

[root@BJ-monitor-h-01 mysql]# ls

data.sql images.sql schema.sql

导入三个库:

[root@BJ-monitor-h-01 mysql]# mysql -uzabbix -p zabbix < schema.sql Enter password:

[root@BJ-monitor-h-01 mysql]# mysql -uzabbix -p zabbix < images.sql Enter password:

[root@BJ-monitor-h-01 mysql]# mysql -uzabbix -p zabbix < data.sql 复制到启动项:

cp misc/init.d/fedora/core5/zabbix_server /etc/init.d/zabbix_server cp misc/init.d/fedora/core5/zabbix_agentd /etc/init.d/zabbix_agentd 修改配置文件位置:

Check of pre-requisites Configure DB connection Zabbix server details Pre-installation summary Install

Welcome to

Zabbix 3.0
